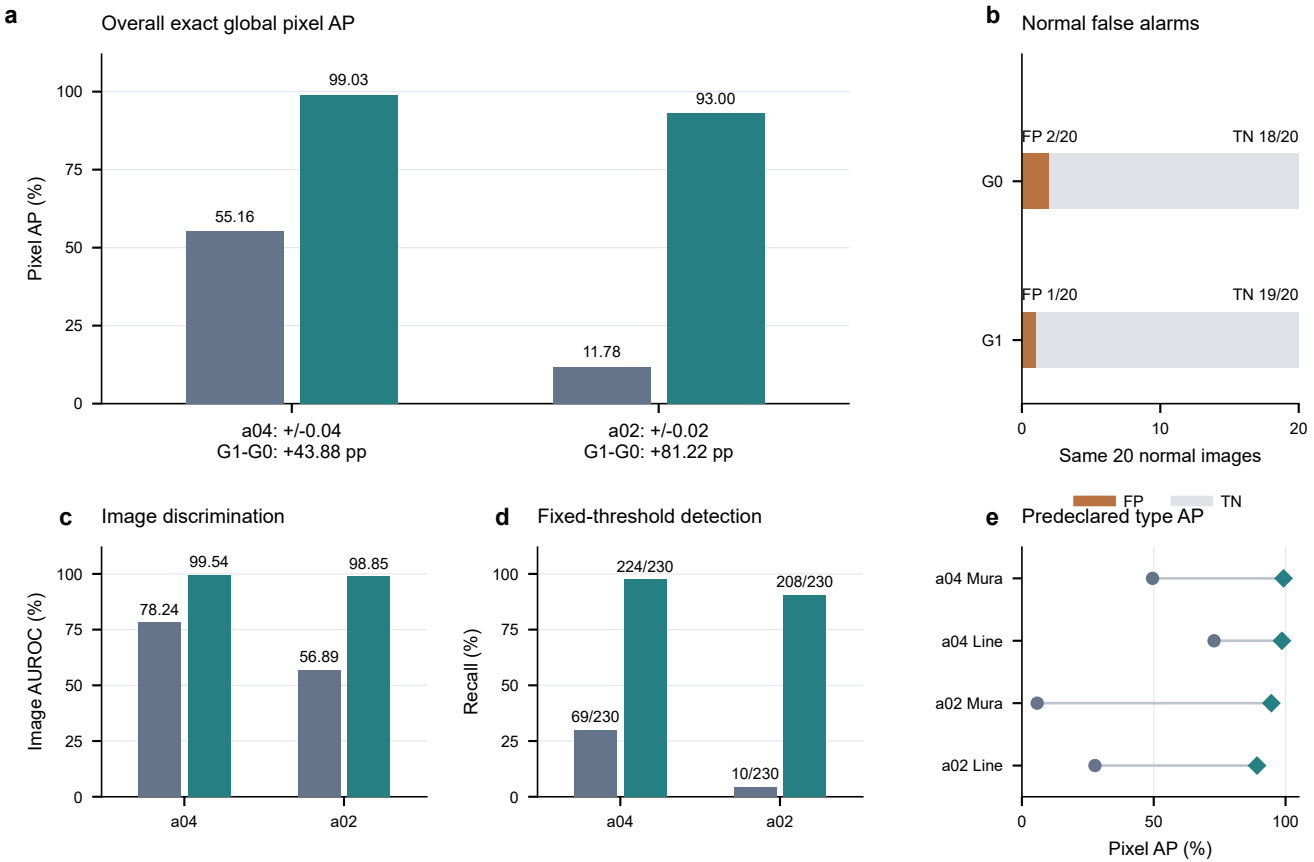
Shared simulator-domain evaluation

Frozen G0/G1 models; held-out normal backgrounds; one training seed



Generation: 460/480 valid; 230/240 per strength. Each overall group: 230 anomalies + SAME 20 normals.

Overall AP: 16,384,000 pixels, 219,208 positive. Each type: 115 anomalies + the same 20 normals.

20 backgrounds; related variants; descriptive only (no CI/tests). G1-renderer domain; no real-screen claim.
